

## Appendix D: Laboratory Specific Safety Procedures

### 1. Purpose

This appendix is provided as a place to document laboratory specific exceptions or additions to the procedures found in this biosafety manual.

- List lab specific training requirements
- Specific equipment decontamination procedures used in the laboratory
- Specific protocols and the types of personal protective equipment worn
- Lab specific waste disposal procedures

### 2. Responsibility

Anyone with supervisory responsibility has the responsibility to assure that safe working conditions are maintained. All employees are required to comply with procedures that apply to their own action and conduct on the job, and to report accidents, injuries and unsafe conditions to his or her supervisor.
