

Environmental Health & Safety Department (EH&S)
Programs and Services by Functional Sections

Radiation Safety	Environmental Programs	Research and Occupational Safety	Occupational Safety and Health	Campus Preventive Health	Planning and Administration
Environmental surveillance	Chemical inventory management MyChem database	Biological safety: Biohazardous waste Biological use authorization Biosafety cabinet certification Bloodborne pathogens Select Agent and BSL3	Accident, injury, illness Prevention & incident management	Employee Health Center	Finance, administration, operations
Radioactive materials authorization, procurement, and safety	Chemical/hazardous waste management		Safety training	Occupational Health: Immunizations Medical clearance/screenings/exams Medical management	Information technology solutions
Non-ionizing radiation safety	Chemical spill advice		University- Wide Health & Safety Committee		Strategic planning
Human subjects research approvals	Environmental pollution prevention: air, water, & soil	Animal care and use safety: Animal and research protocol occupational health reviews	Industrial Hygiene: Air quality Chemical safety Exposure assessment/sampling Hazard communication Hearing loss prevention Job hazard analysis Personal protective equipment Regulated building materials Respiratory protection	Biological/hazardous material exposure medical follow-up	Communication and outreach
Personnel monitoring	Contaminated sites	Laboratory safety: Inspections Field safety Fume hood testing Room entry caution signs		Health Sciences student immunization compliance	Data analysis
Radiation instrument calibration	Underground storage tanks	Diving and boating safety	Physical Safety: Crane/Hoist/Rigging safety Confined spaces Electrical safety Ergonomics Fall protection Hazardous energy control Powered Industrial Trucks Shop/Makerspace safety	Environmental public health: Food safety Drinking and recreational water Pests and wildlife	
Radioactive waste management	Hazardous materials shipping			Advisory Committee on Communicable Diseases (ACCD)	
Radiation machine and X-ray safety	Hazardous materials recycling	Institutional Biosafety Committee Diving Control Board Institutional Chemical & Physical Safety Committee Infectious Waste Committee	Building/Fire Safety: Capital project safety design Compressed gas Cryogenics fluid Emergency washing Facilities project support Fire and life safety Local exhaust ventilation Pressure vessel safety	Communicable disease response & prevention	
Institutional Radiation Safety Committee					
Laser safety
