UNIVERSITY OF WASHINGTON GUIDANCE FOR SYMPTOM MONITORING FOR COVID-19

May 7, 2020

The Washington Department of Labor & Industries (L&I) Division of Occupational Safety and Health (DOSH) Directive 1.70 requires that employers have a program to prevent sick employees from entering the workplace and when recognized, that ill employees are sent home. This guidance applies to faculty and other academic personnel, staff, students, contractors, visitors, volunteers and other personnel who present in-person at any University work site. UW Medicine personnel should follow established protocols for medical center employees.

University departments have the following responsibilities:

1. **Communicate** that personnel and visitors must stay home if they are sick or have symptoms consistent with COVID-19 infection, even if symptoms are mild. This includes cough, fever, shortness of breath, and other respiratory symptoms. Communicate that personnel who develop symptoms while at work, must leave the workplace.

2. **Ensure ill employees do not come to work on campus.** Supervisors may not allow ill employees to come to work or remain in the workplace.

3. **Display posters with this message** in your workplace and at building entrances. University Stay Healthy, Huskies messaging and graphics are online. Combine this with other communication channels commonly used in your department or unit.

In addition, the DOSH Directive 1.70 recommends health surveillance to identify early signs of infection, and separate workers who may present a risk to others prior to entering the workplace. Public health agencies also recommend that employers implement COVID-19 symptom screening, which can include symptom self-attestation. Symptom self-attestation involves an individual reviewing a list of symptoms and declaring the presence or absence of those symptoms. Units that implement of other types of health surveillance methods should contact the EH&S Employee Health Center at emphlth@uw.edu.

The University has developed an enterprise-wide tool through Workday that is required for UW units to conduct daily symptom self-attestation for all staff and student employees, and academic personnel working on site at a UW work location. UW units with existing symptom monitoring procedures will be expected to transition to the Workday symptom attestation tool. Contractors and vendors are subject to symptom attestation requirements when working at a UW work location.

**SYMPTOM SCREENING GUIDANCE FOR UW UNITS THAT DEVELOP CUSTOMIZED PROCEDURES**

UW units with personnel who are unable to complete the symptom attestation in Workday (e.g., contractors, vendors) may develop a separate or customized procedure for symptom screening. Units are required to consult with Human Resources, Labor Relations, and UW-IT (for electronic attestations) to ensure systems meet existing privacy and security requirements. In addition, UW units that develop customized symptom screening procedures:

- Are required to establish a protocol that aligns with the guidance in this document and adheres to all applicable federal, state and local regulations, and University policies.
May determine the screening method, frequency, procedures for reviewing screening results, and assign responsibility for follow-up actions, notification and recordkeeping

1. Screening method:
   - Ask individuals to review a list of symptoms and attest to **not** having COVID-19 symptoms prior to arriving on site. Ask the questions as stated in the **Example Symptom Self-Attestation** in this document. UW units that wish to deviate from the text provided in the Example Symptom Self-Attestation must first consult with UW Human Resources and the Environmental Health & Safety Department (EH&S).
   - UW units can choose to conduct screening via email, phone, online survey (e.g., Catalyst) or paper survey.
   - Screening conducted in person is allowed only if social distancing rules (6 feet of distance between individuals) are followed.

2. Frequency: Conducting screening is not required more than once per day; however, some worksites may choose to add a second screening at the end of each shift. Units should develop a procedure for individuals to document themselves as “screened” on the current date to avoid repeat screenings.

3. Communicate prior to screening:
   - The purpose, requirements for participation and screening procedures.
   - The requirement to stay home or leave a campus worksite if an individual cannot attest to being without symptoms.
   - The unit or department’s time away from work policy and HR consultant contact information (as appropriate).
   - The confidentiality of screening records that will be kept separate from personnel records.

4. Follow the unit’s protocol based on daily screening results, including determining whether, how and when screening results will be reviewed and what actions will be taken based on the results.

5. Exclusion criteria: Personnel who cannot attest to being without symptoms are required to stay home to monitor their symptoms until they are no longer ill or symptomatic. Those with suspect or confirmed COVID-19 should meet public health criteria for **discontinuing home isolation** before returning to work.

6. Medical: Individuals with COVID-19 symptoms should contact their health care provider for medical guidance. Refer to the FAQ “**What do I do if I feel sick?**” on the University’s Novel coronavirus & COVID-19 webpage for instructions and testing information for UW employees.

7. Notification: University units and personnel are **required to report suspected or confirmed cases** of COVID-19 to the **EH&S Employee Health Center** at 206.685.1026 or **emphlth@uw.edu**. **UW Medicine personnel should contact their respective employee health center**.
   
   Visit the **UW Novel coronavirus & COVID-19** webpage for information on the University’s response when a member of the UW community has confirmed COVID-19, specifically the FAQs:
   - How does the UW respond when a member of the UW community has confirmed COVID-19?
   - How does the UW follow up with close contacts of a person who tested positive for COVID-19?
8. **Compliance and records retention:** The UW unit must maintain the symptom screening/attestation as a confidential record that is retained separately from other records, including from an individual’s personnel record. These records must be retained for six years from the beginning of the following calendar year according to the retention schedule approved by the Washington State Records Committee. In compliance with non-discrimination laws, employers are allowed to ask employees if they are experiencing symptoms of the pandemic virus during an outbreak.

9. **COVID-19 Prevention:** UW units with personnel who must work on site to perform work to support critical operations are required to adhere to current health and safety standards and the DOSH Directive 1.70. Refer to the University Requirements for COVID-19 Prevention in the Workplace.

**EXAMPLE COVID-19 SYMPTOM SELF-ATTESTATION FOR ON-SITE PERSONNEL AND VISITORS**

Since your last day of work, or since your last visit to a University facility, have you experienced any of the following symptoms?

- A new **fever** (100.4 F or higher) or a sense of having a fever?
- A new **cough** that you cannot attribute to another health condition?
- New **shortness of breath** that you cannot attribute to another health condition?
- A new **sore throat** that you cannot attribute to another health condition?
- New **muscle aches** that you cannot attribute to another health condition or that may have been caused by a specific activity, such as physical exercise?
- New **respiratory symptoms**, such as sore throat, runny nose/nasal congestion or sneezing, that you cannot attribute to another health condition?
- New **chills or repeated shaking with chills** that you cannot attribute to another health condition?
- New **loss of taste or smell** that you cannot attribute to another health condition?

I attest that prior to coming in to work on today's date that I do not have any of the above symptoms.

☐ I read the above statement.
☐ I attest that I do not have any of the above symptoms.

If you are sick or have one or more of the above symptoms:
- You must stay home or leave the UW facility at which you are working.
- Follow your department’s procedure for calling out sick or requesting to work from home.
- Contact your health care provider for medical guidance.
- Follow the guidance on the FAQ **What do I do if I feel sick?** at the UWs [Novel coronavirus & COVID-19 facts & resources](http://www.ehs.washington.edu) webpage.
